

SUMMARY

Hi viewer, as the name suggest this project is for a college website. Here you will see functionalities such as OTP verification (through the code only), Email confirmation (over gmail), Database to store credentials for login and signup purpose and Application form details, Database update for change password and Edit application form, check-sums at each needed place and a decent display of CSS.

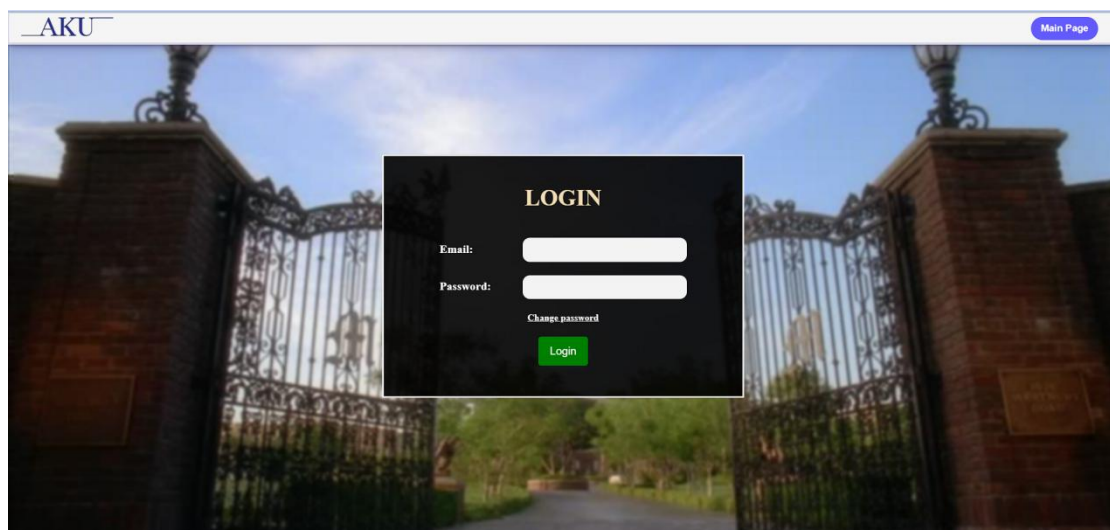

Its an ongoing project I am working on this in my dev env and will add features. This website can be extended as you like, if any help needed feel free to contact me at kashyap06abhinav@gmail.com.

WORKING

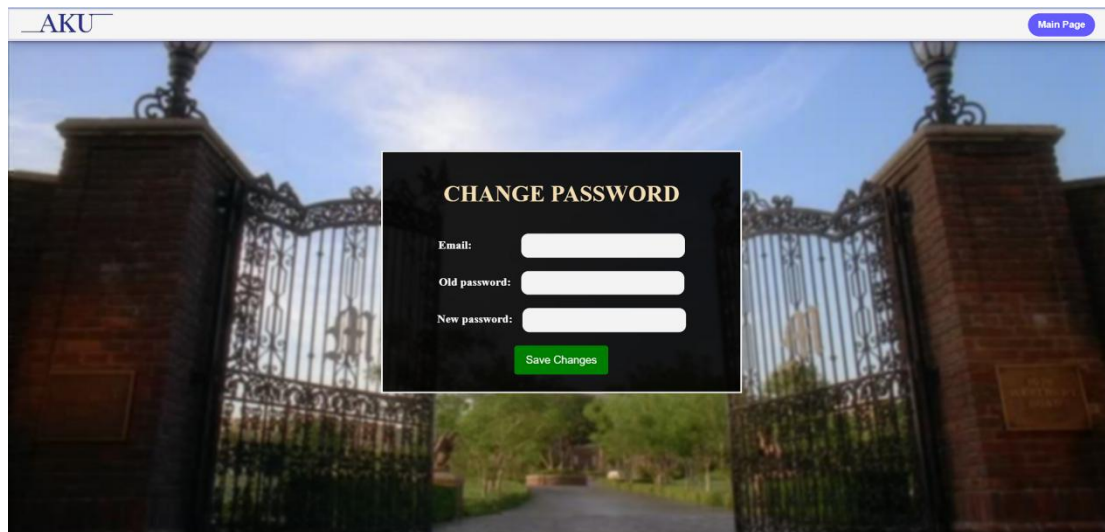

1 Landing Page: This is what user will see first when visiting the website.

2 Login page: This page is for existing users to login and access there data and other stuff.

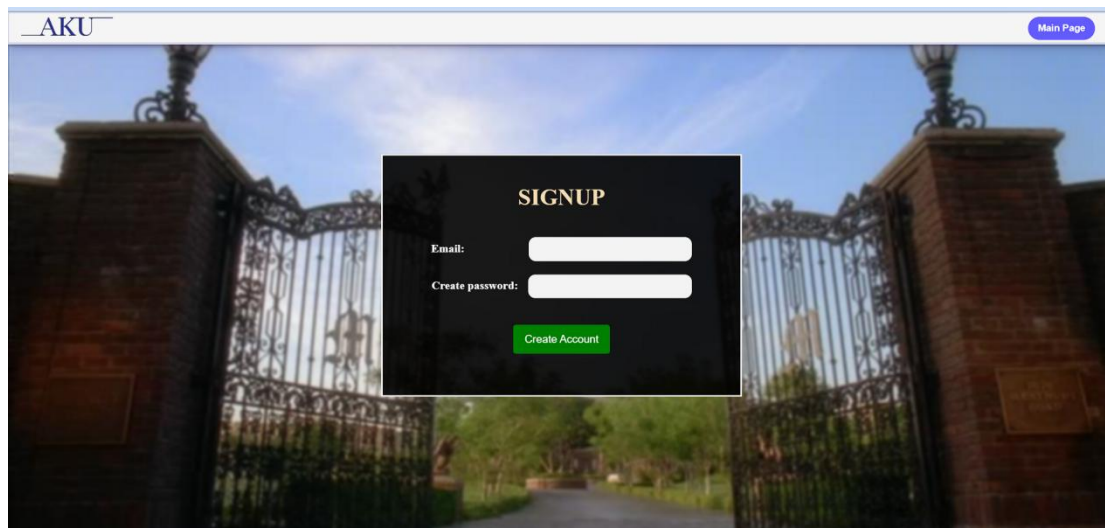

3 Login > Change password : If user wish to change password it can be done here after an OTP verification.

The screenshot displays the AKU website's 'CHANGE PASSWORD' interface. The background features a large, ornate wrought-iron gate flanked by brick pillars, with a path leading through it. A dark, semi-transparent modal box is centered on the screen, containing the title 'CHANGE PASSWORD' in gold. Below the title are three white input fields labeled 'Email:', 'Old password:', and 'New password:'. A green 'Save Changes' button is positioned at the bottom of the modal. The website's header includes the AKU logo on the left and a 'Main Page' link on the right.

4 Sign-up page: New users can create an account after OTP verification. After signup each user will receive an Welcome Email (shown later in pdf).

The screenshot displays the AKU website's 'SIGNUP' interface. The background is identical to the previous screenshot, showing the ornate gate and path. A dark, semi-transparent modal box is centered, with the title 'SIGNUP' in gold. It contains two white input fields labeled 'Email:' and 'Create password:'. A green 'Create Account' button is located at the bottom of the modal. The header shows the AKU logo and a 'Main Page' link.

5 Student area (for new user after sign-up or haven't filled application form): User will go to application form from here or can access other pages or data which can be populated as required.

The screenshot shows the 'STUDENT AREA' interface. At the top left is the AKU logo, and at the top right is a 'Logout' button. The background is a blurred image of students in a library. A white modal box is centered on the screen, displaying the following information:

Email: abhinavthegreatk@gmail.com
Unique ID: vk2KuMsS
(keep note of it, as this will be needed everywhere)
You can fill the application form now.
[Application Form](#)

6 Student area (for users already submitted application) : Same as above this page has its features and others can be added as per required for college.

The screenshot shows the 'STUDENT AREA' interface for a user who has already submitted an application. At the top left is the AKU logo, and at the top right is a 'Logout' button. The background is a blurred image of students in a library. A white modal box is centered on the screen, displaying the following information:

Email: kashyap06abhinav@gmail.com
Unique ID: OkmiSCq
A form is already submitted with this account.
[View Form](#) [Edit Form](#)

7 Application Form page:

- Takes all the required user details from user for applying in the college.
- Same page is used if the user wants to Edit an existing form. All details are taken from database to pre-fill the form and then user can edit those.
